PORTFOLIO

[GitHub link ↗](#)

[Leetcode link ↗](#)

[HackerRank link ↗](#)

[Portfolio link ↗](#)

PROJECTS

[Anonymous_Chats ↗](#)

Nov 2024

• Created a real-time interaction app designed to prioritize user privacy while enabling seamless communication and data exchange. • Developed with Express.js for back-end services, MongoDB for secure data storage, Socket.io for real-time communication, and TailwindCSS for building a clean, responsive front-end.

[Youtube-Clone ↗](#)

Oct 2024

• Developed a YouTube clone incorporating key features like video streaming, comment management, user registration and authentication via JWT, channel creation, and video uploads, providing a seamless user experience. • Built using the MERN stack.

[ShoppYGlobe - ECommerce App ↗](#)

Aug 2024

• Created an eCommerce web front-end featuring dummy products from dummyjson.com for a modern, interactive shopping experience. • Made with React.js for dynamic UI, Redux for state management, and Material Tailwind for responsive, modern design.

[Task_Manager ↗](#)

Nov 2024

• Developed a task management app that allows users to add, search, filter, update, and delete tasks, with data persisted in local storage for seamless experience. • Built with Vite+React for faster development and bundling, and designed using Material Tailwind for a modern and responsive UI.

[ShoppYGlobe-Server ↗](#)

Sep 2024

• Built a back-end for the ShoppYGlobe app to handle product listings, user management, and shopping cart data, ensuring smooth functionality and data flow. • Developed using Express.js to build efficient API endpoints, and MongoDB for seamless data storage and retrieval, enabling scalable data handling and management.

[Weather Hunting ↗](#)

May 2024

• Built a weather information website that allows users to fetch weather details for a specific city or their current location. • Created with Node.js & TailwindCSS.
